

BORGESON
UNIVERSAL COMPANY, INC.

Collapsible Intermediate Shaft

Male ends\$59.40
Female & Male ends\$57.44

Splined & DD Shafting

Borgeson "custom fits" your steering shaft and joints to your car. Components can be switched from one location to another to give you the best setup for your particular vehicle.

Steel DD Shafts

18" Length \$16.43
36" Length \$22.00

Stainless DD Shafts

..... add \$20.00 for Polished
22" Length \$44.25

Spline Shafts - Steel

2" Length \$20.09
4" - 16" Length \$32.57
17" - 36" Length \$35.29
5", 16", 36" Spline one end only \$22.00

Spline Shafts - Stainless Steel 1" Increments

..... add \$20.00 for Polished
4" - 16" Length \$40.72
16+" to 36" Length \$44.25

Custom Spline Shafts - Stainless Steel

..... add \$20.00 for Polished
4 - 16" Length \$59.63
16+ - 36" Length \$64.64

Spline Shafts - Aluminum

4" - 16" Length \$40.72
18" - 36" Length \$44.25

Vibration Reducers

Eliminate all of the noise, vibration and harshness, for example, of concerns to all automotive enthusiasts. These reducers have been shown to increase the overall life of the steering components, including the steering column.

In Line (all avail. combinations) \$68.41
Polished Cover Only \$84.69

Steering Shaft Support Bearing

The support must be mounted to the frame, not to a sheet metal section of the body. Sheet metal will not withstand the stresses. The shaft should fit easily through the support with no binding. A system with a double u-joint and a single u-joint counts as a three joint system and would require a support bearing. *Note: all support bearings work with round or DD shafting*

SHAFT SUPPORT BEARINGS

Steel	Stainless Steel	Polished Stainless	Description
700000	710000	720000	Steel Rod End Bearing
670000	680000	690000	Billet Support 2-1/2"
670600	N/A	N/A	Billet Support 6"

Power Steering Pumps

Self-Contained Saginaw GM Power Steering Pump
These self-contained power steering pumps are available with either steel or aluminum pulleys. Remanufactured to OEM specs. Brackets are available for most popular applications. *Now available with a show winning chrome finish.*

GM Power Steering Pumps
Power Steering Remote Pump Mounting Kit

Type-2 kits are for V-belt drives and type-3 for serpentine small and big block Chevy applications. Pump mounting kit includes: bracket, pulley and adjuster bar (pump not included).

Single Needle Bearing Universal Joints....16 Series

Borgeson's needle bearing joints have the distinct advantage of lasting as much as 10 times longer than non-needle bearing joints. We recommend only needle bearing joints for vehicles that are used on the street. The Borgeson needle bearing joints have no backlash or radial play. They are permanently lubricated and sealed. They require no maintenance.

Available U-Joint Combinations (steel and aluminum)

Smooth Bore on each end\$66.22
Smooth Bore & Spline or DD\$70.04
Spline and/or DD on each end\$73.83

Available U-Joint Combinations

..... stainless steel add \$25.00 for polished
Smooth Bore on each end\$77.09
Smooth Bore & Spline or DD\$81.44
Spline and/or DD on each end\$85.78

Double Needle Bearing Universal Joints....16 Series

Excessive angles over 35* can be avoided by using Borgeson's 16 Series Double U-Joint. These doubles accommodate angles up to 70* and are available in all spline and DD configurations. *** Because a double joint used in combination with a single joint will function the same as a 3 joint system, a shaft support bearing is required to prevent the shaft from "looping" and binding.*

Available U-Joint Combinations (steel and aluminum)

Smooth Bore on each end\$132.47
Smooth Bore & Spline or DD\$136.27
Spline and/or DD on each end\$140.07

Available U-Joint Combinations

..... stainless steel add \$37.00 for polished
Smooth Bore on each end\$153.10
Smooth Bore & Spline or DD\$157.44
Spline and/or DD on each end\$161.78
